CtHIMA’s All-Day Session on Leveraging and Managing Your Data to Better Achieve Goals

Agenda

Wednesday, May 22, 2019

Founder's Hall Pavilion
Middlesex Community College
100 Training Hill Rd.
Middletown, CT 06457

8:30 – 9:00  Registration and Breakfast
Provided by Iron Mountain

9:00 – 10:30  Introduction to Project Management
Cindy Zak MS, RHIA, PMP, FAHIMA; Executive Director, Revenue Services at Yale New Haven Health
Focusing on planning, managing and organizing the available resources. Objectives and goals of the organization can be achieved in an efficient manner through proper project management. A project manager can help forecast risk that might arise during the production process and ensure that these risks are addressed with a proper plan.

10:30 – 12:00  Information Governance: A Best Practices Approach to Mitigating Risks and Improving Resilience
John Moynihan, CPHIMS; Healthcare Business Development at Iron Mountain
Information is one of any Healthcare Organization’s most valuable resources and needs to be treated as such. With the complexity found within the Healthcare industry, including the frequent changes in regulation, care delivery models, concerns for patient safety, and the need for greater transparency, how you manage your information has a direct impact on your organization’s success.

By implementing an overarching and effective Information Governance program you can transform your organization by reducing costs, minimizing risks, and building resilience. This way you can turn your data into a resource that can be used to gain insight into your world and provide more value as opposed to being just a necessary burden that has to be protected.

12:00 – 12:30  Lunch with CtHIMA Updates from Jim Donaher, CtHIMA President and Karen Lawler, Past-President CtHIMA and Chair of the CtHIMA Nominating Committee
12:30 – 1:30  Predictive Analytics in Healthcare

Mary Lyon, Vice President, Integrated Health Information, Connecticut Hospital Association

Predictive analytics is the process of learning from historical data to make predictions about the future. For health care, predictive analytics will enable the best decisions to be made.

1:30 – 2:30  Healthcare’s Top Ten Challenges for 2019

Karen Lawler, RHIA, CHPS, FABC; Corporate Director Health Information Management and Privacy Officer at the Hospital for Special Care

For more than 10 years, the Healthcare Executive Group has annually queried its members to see what’s keeping them awake at night. The effort has provided insight into primary opportunities, challenges and issues currently facing healthcare executives and a potential roadmap for HIM professionals.

2:30 – 3:30  Risk Adjustment Methodologies in Healthcare Today

Jim Donaher, RHIA, CDIP, CCS, CCS-P; Clinical Content Development Analyst at 3M HIS

We are all familiar with the HCCs, but are we aware there are more than one set of HCCs? How were the risk methodologies developed and where are they going? Quality data can help us better understand and show our patients’ risk. Examining the data can identify opportunities for improvement.

~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~

6.5 CEUs will be offered for this full day session.
